

Harshvardhan Pundir

Data Analyst (Fresher)

+91-7017888059 | harshvardhanpundir332@gmail.com | Portfolio: pundirharsh.github.io/harsh-portfolio/

PROFESSIONAL SUMMARY

Detail-oriented and analytically minded fresher with a strong foundation in Python, SQL, and Excel for data cleaning, analysis, and visualization. Skilled at translating raw data into clear, actionable insights through academic projects and self-directed case studies. Seeking an entry-level Data Analyst role to apply statistical and analytical skills to real-world business problems.

TECHNICAL SKILLS

- Programming & Query Languages: Python (NumPy, Pandas), SQL, PostgreSQL
- Data Visualization: Power BI, Tableau, Matplotlib, Seaborn
- Tools & Platforms: MS Excel (Pivot Tables, VLOOKUP, Power Query), Jupyter Notebook, Git/GitHub
- AI & Automation: Prompt Engineering, AI-assisted Data Analysis (ChatGPT/Gamma AI), AI-driven Reporting
- Concepts: Data Cleaning, Exploratory Data Analysis (EDA), Statistics, Dashboarding, A/B Testing basics

EDUCATION

Bachelor of Computer Applications (BCA)	2022 – 2025
--	-------------

Maharaja Agrasen Himalayan Garhwal University (MAHGU)

12th (PCM)	2021 – 2022
-------------------	-------------

Janta Inter College, Muzaffarnagar

PROJECTS

Customer Shopping Behavior Analysis | Python, SQL, Power BI, Gamma AI

<https://github.com/pundirharsh/Customer-Shopping-Behavior-Analysis>

- Cleaned and analyzed retail transaction data using Python (Pandas, NumPy) to uncover purchasing patterns across demographics, categories, and seasons.
- Wrote SQL queries to evaluate customer segments, discount effectiveness, and subscription vs. non-subscription spend.
- Built an interactive Power BI dashboard to visualize sales trends and customer behavior for stakeholder decision-making.
- Created a business-ready presentation using Gamma AI to communicate findings and recommendations.

OTT Customer Churn Analysis | SQL, Python, Jupyter Notebook

<https://github.com/pundirharsh/OTT-Customer-Churn-Analysis>

- Analyzed OTT subscription data using SQL and Python to calculate churn rate across customer segments and subscription plans.
- Performed exploratory data analysis (EDA) in Jupyter Notebook to identify key churn drivers such as engagement and billing patterns.
- Visualized churn trends with Matplotlib and Seaborn, and summarized insights into actionable retention recommendations.

ADDITIONAL INFORMATION

- Languages: English, Hindi
- Interests: Sports analytics, open-source data projects, competitive coding practice
